

Photography Albums

A photo album is the absolute best way to cherish and share your wedding moments. Don't let your photos sit on a disc for eternity bring them to life! Each album from Sean Lara Photography is custom designed and created with your specific wedding in mind - there's no templates, no dragging and dropping of photos, everything is crafted just for you. Sure, you could attempt to make an album yourself on one of the "do it yourself" websites, but the templates they have are boring, the print quality is terrible, and the pages rip and stain easily. There's nothing better than having the peace of mind that your album will come out beautiful, just like your photos, and with a variety of affordable options, there's an album for everyone.

Variety of Colors and Options

Just like you and your photos, your album should be unique. With five album covers to choose from in a variety of colors and options, you can personalize your album to your liking. You can also choose different paper types, add extras such as foil stamping, and even pick which photo you want on the cover of your album!

Flush-Mount Pages for Durability

All albums come with thick, flush mount pages for lifetime durability. This means no wrinkles, no rips and no bent pages. The pages lay flat giving it a professional feel, and each image is viewed exactly how it was intended to look with no distortion.

Proof Before Printing!

After selecting the photos you want for your album, a .pdf proof is emailed to you for approval so you know exactly what you're getting before it arrives on your doorstep. This means no surprises, just exceptional quality and service.

Flush Mount Album Options

These flush-mount wedding albums are beautifully designed and made from the finest printing components. They are available in a variety of covers and finishes, and are the best albums available. Constructed with thick pages that don't bend.
